**Subject:** "Testimony for February 13, 2018 Energy Cmte Meeting"

### **To all House Energy Committee Members:**

I am writing to urge my legislature to move and vote against electric companies forcing consumers to use their smart meters.

I want a meter that measures my electricity usage accurately, and for this reason you want House Bill 4220, the Analog Meter Choice Bill, passed.

I have watched my bills keep going up and small fees being added to my bills too. Just in the past week I have had my meter read 18 kWh for one day and days before and after read 77.1 kWh and 88.9 kWh. Something is wrong with how these meters are reading my usage. In April of 2017 my usage went up drastically for no reason. Back in August of 2016 I had a geo thermo heat pump installed and my average usage per day was less in the winter months than it was starting April of 2017. Around this same time DTE finally installed my second smart meter too. I have not changed my manner of living for the past 4 years. I run my dryer on propane gas and my fireplace. My fireplace I use often to offset the amount of energy being used by my geo thermo heat pump. Here is a list of my average daily usage going back to October of 2016-January 2018.
